# SIEMENS

Total Water Solutions

Complete Cartridge Range

Full Service Support

Siemens Water Technologies is a single source provider of water treatment products and services for the laboratory market. We offer the widest range of water purification systems including central systems, pretreatment and point-of-use ultrapure water polishing systems, backed by a service network of over 80 offices throughout the US and Canada.

Siemens offers ELGA LabWater Systems.

For complete ordering information and general information please see page 53.

## TYPE I

MODEL	Technology	Flow Rate
PURELAB® Ultra Systems	DI/UV/UF/microfiltration	2 lpm
<b>Typical Applications:</b> ICP/MS, electrophoresis, GC, PCR, Genetic research, microbiology, pyrogen testing, TOC analysis, HPLC, IC, Cell Culture, Reagent and sample prep, AA		

MODEL	Technology	Flow Rate
PURELAB® Classic Systems	DI/UV/UF/microfiltration	1.5 lpm
<b>Typical Applications:</b> HPLC, AA, ICP, tissue culture, blotting, GC, reagent and sample prep, buffers, TLC, environmental studies		

MODEL	Technology	Flow Rate
PURELAB® UHQ Systems	RO/DI/UV/ultramicrofiltration	0.75 lpm
<b>Typical Applications:</b> General Chemistry, reagent and sample Prep, qualitative analyses, HPLC, AA, IC		

MODEL	Technology	Flow Rate
MODULAB® High Flow Systems	DI/UV/ultramicrofiltration	14 lpm
<b>Typical Applications:</b> Glassware washing, reagent prep and wafer rinsing.		

## TYPE II

MODEL	Technology	Flow Rate
PURELAB® Option-S	RO/DI	7, 15, 30, 60 lph
<b>Typical Applications:</b> General laboratory analysis, Glassware washing/rinsing, Buffer Preparation		

PURELAB® Option-R	RO/DI/UV	7, 15, 30, 60 lph
<b>Typical Applications:</b> General purpose HPLC, Flame AA, Electrochemistry, Spectrophotometry		

PURELAB® Option-Q	RO/DI/UV	7, 15 lph
<b>Typical Applications:</b> General laboratory analysis, Glassware washing/rinsing, Buffer Preparation		

MODEL	Technology	Flow Rate
MEDICA® PRO S/R/RE/R-200	RO/DI/UV/ultramicrofiltration/microfiltration	7, 15, 30, 60, 120, 200 lph
<b>Typical Applications:</b> Feed water to clinical analyzers		

## TYPE III

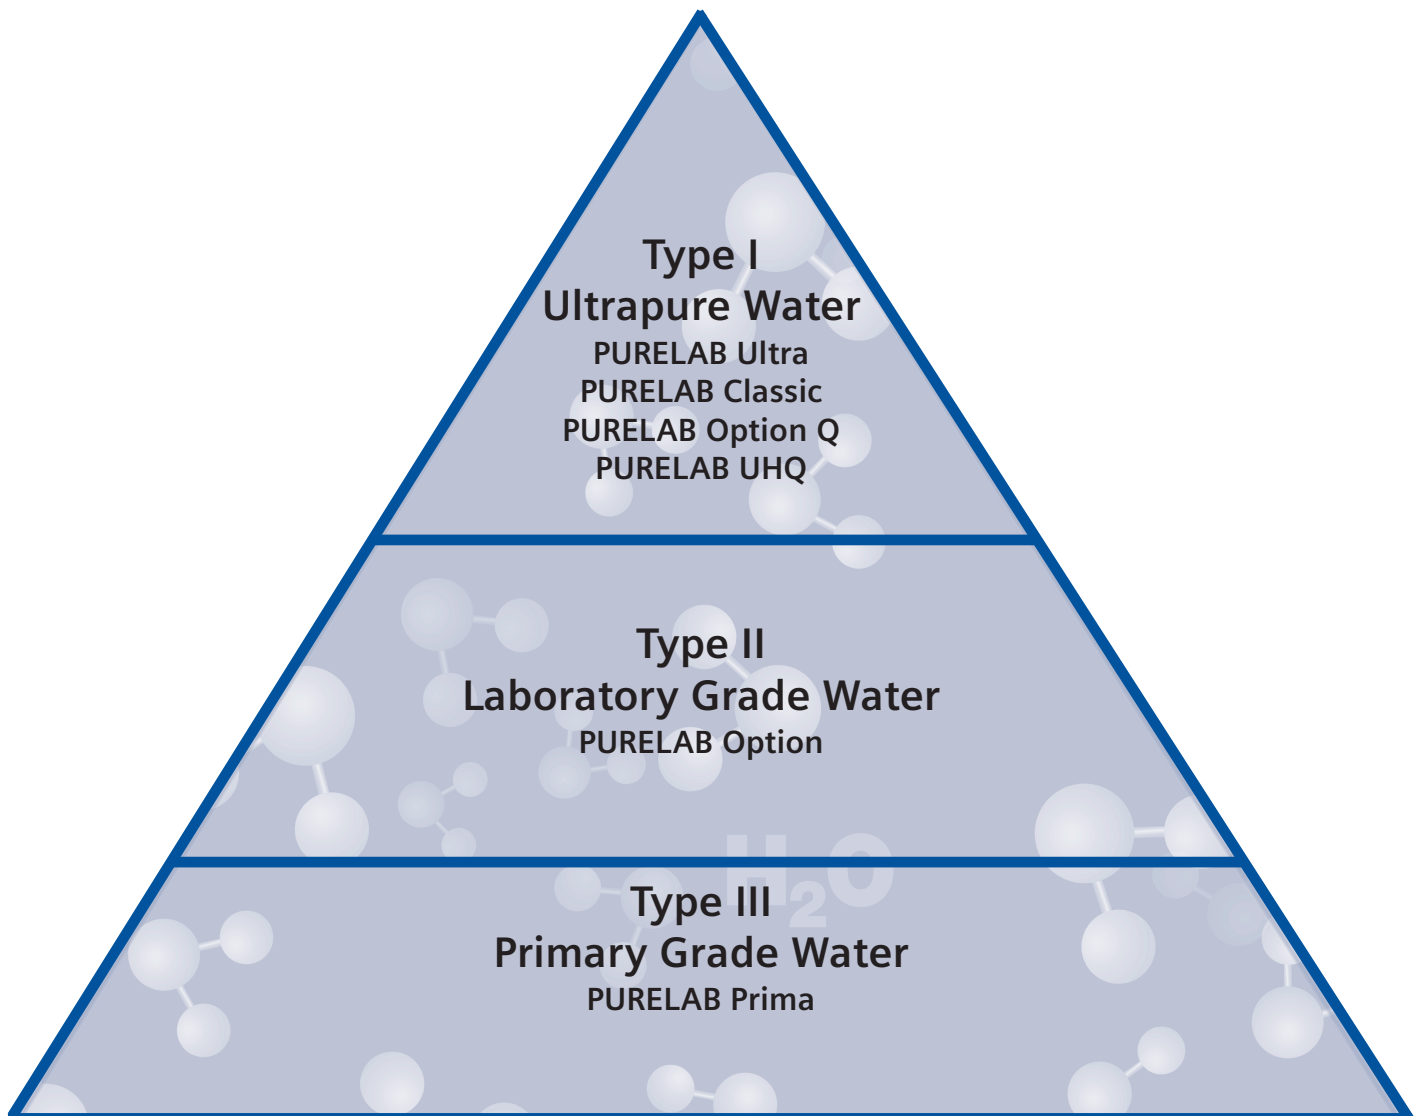

MODEL	Technology	Flow Rate
PURELAB® Prima	RO	7, 15, 20, 30, 60, 90 or 120 lph
<b>Typical Applications:</b> Pretreatment to the polisher		

MODEL	Technology	Flow Rate
CENTRA® High Flow, MDS, LDS, RDS, S-200, R-200	RO/DI/UV	18,38 lpm
<b>Typical Applications:</b> Feed water to multiple floors, faucets, polishers, glassware washers, autoclaves		

## PURELAB® Systems Define Quality

## PURELAB® Ultra Water Purification System

State-of-the-art intelligent water system delivers ASTM Type I ultrapure water for critical biological and analytical applications. Designed to ensure the highest quality water with the most advanced smart monitoring system.

### Standard Features and Benefits

- 18.2 Megohm purity water up to 2.0 lpm
- Direct on-line real time TOC monitoring (Analytic and Genetic)
- Unique CID (cartridge identification) technology provides full traceability and history of purification cartridge packs for validation
- 5 models to choose from
- Worker polisher purification design reduces annual costs by 50%
- Programmable dispense with auto alarm and shut off prevents flooding
- Volumetric Profile Memory dispense
- Friendly consumable change-out reminders

### PURELAB® ULTRA SYSTEM SPECIFICATIONS

#### Performance Specifications\*

MODEL	Resistivity	Flow Rate (lpm)	TOC (ppb)	Endotoxins EU/ml	Bacteria CFU10/ml
PURELAB Ultra Scientific	18.2	up to 2.0	3-10	NA	<1**
PURELAB Ultra Ionic	18.2	up to 2.0	3-10	NA	<1
PURELAB Ultra Analytic	18.2	up to 2.0	1-2	NA	<1
PURELAB Ultra Bioscience	18.2	up to 2.0	3-10	<0.001	<1
PURELAB Ultra Genetic	18.2	up to 2.0	1-3	<0.001	<1

\* Specifications based on RO pretreatment

\*\* < 1 CFU/ML w/0.2µm filter

#### System Dimensions

MODEL	HxWxD (in)	Weight lbs
PURELAB Ultra Scientific	19x16x14	38
PURELAB Ultra Ionic	19x16x14	39
PURELAB Ultra Analytic	19x16x14	40
PURELAB Ultra Bioscience	19x16x14	39
PURELAB Ultra Genetic	19x16x14	40

#### Feed Water Parameters

Maximum Fouling Index	<1*
Maximum Conductivity (RO Feed)	50 µS/cm
Minimum Resistivity (SDI Feed)	1 MΩ-cm
Maximum TOC	50 ppb
Maximum Free Chlorine	<0.05 ppm
Maximum Carbon Dioxide	30 ppm
Maximum Silica	2 ppm
Particulates	Down to 0.2 µm filtration
Temperature	1-40 °C
Feedwater Flow Rate	Maximum requirement 130 lph
Maximum Pressure	10 psi
Minimum Pressure	1 psi or flooded suction to the recirculation pump
Power Requirements	100-240 VAC, 50-60 Hz (all models)

\*A 0.2µm prefilter recommended for all non-RO feeds.

#### Purification Technology

### PURELAB® Ultra Systems ORDERING INFORMATION

MODEL	Catalog Number
PURELAB Ultra Scientific	ULXXXSCM2
PURELAB Ultra Ionic	ULXXXIOM2
PURELAB Ultra Analytic	ULXXXANM2
PURELAB Ultra Bioscience	ULXXXBSM2
PURELAB Ultra Genetic	ULXXXGEM2
PURELAB Ultra Analytic under-bench system (with remote control station and dispense gun)	ULRSXANM2
PURELAB Ultra Genetic under-bench system (with remote control station and dispense gun)	ULRSXGEM2

Service and Maintenance packages available  
DI (Deionization) Cartridges must be ordered separately

### Consumables and Accessories

#### Consumables

Sanitization Tablets	CT1
UV Lamp 254nm (for Ionic)	LC105
UV Lamp 185nm/254nm	LC118
Ultra microfilter (0.05µm)	LC109
Ultrafilter (5,000 MWCO)	LC151
Point-of-Use Filter (0.2µm)	LC134
Labpure S1 DI Cartridge-RO Feed	LC182
Labpure S2 DI Cartridge-SDI Feed	LC183
Labpure S3 DI Cartridge-Low Ionic	LC184
Labpure S4 DI Cartridge-Low TOC	LC185

#### Accessories

Pressure Regulator Valve Inlet	SDIRG2613*
Wall Mounting Kit (PURELAB Ultra Unit)	LA622USA
RS232 Printer Kit	LA618
Installation Kit (PURELAB Ultra Unit) (supplied)	LA642
Remote Dispense Station (including dispense gun)	LA643
Integral Dispense Gun (PURELAB Ultra Unit)	LA644
Remote Control Station (PURELAB Ultra Unit)	LA645
Open Circuit Ring Main Kit	LA646
Closed Circuit Ring Main Kit	LA647
Pressure Regulator <60 psd	LA652

Storage reservoirs are located on pages 34.

\* For feed pressure above 60 psig, use pressure regulator LA575.

Note: Installation kit supplied with all Ultra systems

### PURELAB® Systems Validation Support

Siemens Water Technologies offers validation documentation support packages for all PURELAB® Ultra water purification products. Validation support manuals include Installation Qualification (IQ), Operational Qualification (OQ) documentation and other quality certification as required to complete validation of the water system. Our service engineers are fully trained to perform certification as required to complete the validation of water system.

## PURELAB® Classic Water Polishing Systems

Cost-efficient alternative for ASTM Type I purity water for general analytical and biological applications. The PURELAB® Classic System offers reliability, and uncompromising water quality.

### Standard Features and Benefits

- 18.2 Megohm purity water up to 1.5 lpm
- Easy front loading cartridges
- Complete sanitization of all wetted parts
- Unique CID Technology provide full traceability and history of purification cartridge packs for validation
- Dual wavelength UV — 185 nm and 254 nm (PURELAB Classic UV Model)
- 5000 Dalton UF Module for pyrogen removal (PURELAB Classic UF Model)
- Wall or bench mountable
- Applications include HPLC, ICP, ICP/MS, GC, IC, AA, cell culture and molecular biology

### PURELAB® CLASSIC SYSTEMS

#### System Specifications

MODEL	Resistivity	Flow Rate† (lpm)	TOC* (ppb)	Endotoxins** EU/ml	Bacteria** CFU/ml
PURELAB Classic DI	18.2	1.5	<3-10	NA	<1
PURELAB Classic UV	18.2	1.5	<1-3	NA	<1
PURELAB Classic UF	18.2	1.5	<3-10	<.001	<1
PURELAB Classic UV/UF	18.2	1.2	<1-3	<.001	<1

\* Depends on feed water conditions.

\*\* Based on regular sanitization and proper maintenance of the system.

† Based on 1 bar feed pressure.

#### System Dimensions

MODEL	HxWxD (in)	Weight (lbs)	Inlet Connections	Power Requirements
PURELAB Classic DI	19x16x14	32	8mm (5/16") OD-Quick Connect	110–240 V 50/60 Hz
PURELAB Classic UV	19x16x14	33	8mm (5/16") OD-Quick Connect	110–240 V 50/60 Hz
PURELAB Classic UF	19x16x14	32	8mm (5/16") OD-Quick Connect	110–240 V 50/60 Hz
PURELAB Classic UV/UF	19x16x14	33	8mm (5/16") OD-Quick Connect	110–240 V 50/60 Hz

#### Feed Water Parameters

MODEL	Operating Temperature	Inlet Pressure	Free Chlorine (ppm)
PURELAB Classic DI	1–40° C	1–10 psig	<0.05
PURELAB Classic UV	1–40° C	1–10 psig	<0.05
PURELAB Classic UF	1–40° C	1–10 psig	<0.05
PURELAB Classic UV/UF	1–40° C	1–10 psig	<0.05

## PURELAB® Classic Water Polishing Systems

### Consumables

Chlorine Sanitization Tablets	CT1
Labpure S5 DI Cartridge	LC186
UF Membrane	LC169
UV Lamp 185/254 nm	LC170
0.2 µm Final Filter	LC134

### Accessories

Integral Dispense Gun	LA644
Remote Dispense Station	LA645
Printer Kit	LA618
Sanitization by-pass block	LA698
Pressure Regulator Valve (Feed Water Pressures >4 bar (60 psi))	LA575
Pressure Regulator Valve (Feed Water Pressures >0.7 bar (10 psi))	LA652
Pressure Regulator <60 psi	SDIRG261
Wall Mount Kit	LA622USA
Remote Dispense Station with Dispense Gun	LA643
Open Ring Main Kit	LA646
Closed Ring Main Kit	LA647
Installation Kit	LA642
Composite Vent Filter	LC136M2

### PURELAB® CLASSIC SYSTEM ORDERING INFORMATION

MODEL	Catalog Number
PURELAB Classic DI	CLXXXDIM2
PURELAB Classic UV	CLXXXUVM2
PURELAB Classic UF	CLXXXUFM2
PURELAB Classic UV/UF	CLXXUVFM2

Purification Cartridges must be ordered separately.  
UF cartridge and UV lamp supplied.

## PURELAB® UHQ Systems

Lightweight, compact, portable ultrapure water system for the modern laboratory requiring up to 15 liters per day of 18.2 Megohm ASTM Type I water. The PURELAB® UHQ System delivers ultrapure water from a tap feed or pretreated feed source for demanding laboratory applications.

### Standard Features and Benefits

- 18.2 Megohm purity water up to 0.75 lpm
- Recirculation feature maintains optimum water quality and inhibits bacterial growth
- Specially conditioned ion exchange resin ensures absolute ionic purity
- UV reactor cell reduces microorganisms and TOC levels
- 0.05 µm absolute filter protects microbore columns in analytical instruments
- Quality meter continually displays resistivity of water
- 4 liter storage tank capacity
- Supplied complete with all consumables

### PURELAB® UHQ SYSTEM SPECIFICATIONS

#### Performance Specifications

MODEL	TOC (ppb)	Particles	Output/per 8 hr day when fed w/RO water	Bacteria CFU/ml
PURELAB UHQ II w/RO	<20	<0.05 µm	15 liters	<1
PURELAB UHQ PS w/out RO	<20*	<0.05 µm	25–40 liters	<1

\* When fed with reverse osmosis (RO) water

#### System Dimensions

MODEL	HxWxD (in)	Shipping Weight (lbs)	Inlet Connections	Power Requirements
PURELAB UHQ II	16x9x16	22	3/4" NPT or 3/8" tube	110/115 V 60 Hz
PURELAB UHQ PS	16x9x16	22	3/4" NPT or 3/8" tube	110/115 V 60 Hz

#### PURELAB® UHQ Feed Water Parameters

MODEL	Feedwater quality	Operating Temperature	Inlet Pressure
PURELAB UHQ II	Potable water free from turbidity & organics (max. free chlorine <0.1 ppm)	4–35° C	Max 90 psi/Min 30 psi
PURELAB UHQ PS	Prepurified, <20 µS/cm and filtered to 0.2 µm or less	4–35° C	Max 90 psi/Min 30 psi

#### PURELAB® UHQ SYSTEMS ORDERING INFORMATION

MODEL	Catalog Number
PURELAB UHQ II Type I water system w/RO	UHQ000IIXX11503
PURELAB UHQ PS Type I water system w/out RO	UHQ000PSXX11503

#### Consumables and Accessories

Purification Pack (2 organic absorption cartridges and 2 ion exchange cartridges)	UHQPACKA
Reverse Osmosis Cartridge	UHQ5
0.05 µm Ultra Microfilter	LC109
UV Lamp	LC104
Composite Vent Filter	UHQ4

Application	PURELAB UHQ II	PURELAB UHQ PS
HPLC	●	●
Atomic Absorption Spectroscopy	●	●
ICP/MS	●	●
Ion Chromatography	●	●

## MODULAB® High Flow Systems

Modular polishing system provides up to 18.2 Megohm quality water on demand. The MODULAB® High Flow System is offered in three models: low TOC (Total Organic Carbon), low bacteria, low pyrogen systems.

### Features and Benefits

- High capacity, low TOC cartridges
- Flow rates up to 14 lpm
- Dual wavelength UV sterilization
- Wall mountable
- Up to 18.2 MΩ-cm water

### MODULAB® HIGH FLOW SYSTEMS

#### Ordering Information

MODEL #	PRODUCT
MHF0ORG1	Modulab High Flow System Low TOC
MHF0SMF2	Modulab High Flow System Bio Model
MHD0SMF5	Modulab High flow System UF Model
<b>CARTRIDGES</b>	
MLHF20DI01	Carbon Cartridge
MLHF20CAR1	Mixed Bed Cartridge
MLHF20OS01	Organic Removal Cartridge
FCUF020S2 (1/PK)	0.2 µm, Filter Cartridge
MLMF020S2 (2/PK)	0.2 µm, Filter Cartridge
FCUF020S05	0.05 µm, Micro Ultrafilter Cartridge
<b>CONSUMABLES</b>	
BULBUV185	UV Lamp
MLHF0C1KIT	Start-up Kit (Low TOC)
MLHFB102	Start-up Kit (Bio Model)
MLHFUF05	Start-up Kit (UF Model)

### General Specifications

#### Operating Parameters

Min Feed Pressure	0.5 psig
Max Feed Pressure	60 psig
Min Feed Temperature	41°F (5°C)
Max Feed Temperature	100°F (37.7°C)

#### Physical Specifications

Length, in (cm)	43 (109)
Depth, in (cm)	8.5 (22)
Height, in (cm)	39 (100)*
UV Bulb Service Clearance, in (cm)	6 (16) Front

#### Utility Requirements

Electrical	
Low voltage service, Single Phase	115 VAC
Breaker required per Code	15 AMP
Feed Water	RO or DI water

\* Requires an additional 4" in height to allow changing of cartridges

### MODULAB® System Specifications

#### Product Water Quality

Min. Flow Rate	2 lpm (0.5 gpm)
Max Flow Rate	Up to 14 lpm (3.7 gpm)
Resistivity	Up to 18.2 MΩ-cm @ 25°C
Total Organic Carbon (TOC)	<15 ppb*
Heavy Metals	<0.10 ppb
Bacteria	<10 cfu/ml**
Endotoxin	<0.05 EU/ml**

\* With organic Removal Cartridge installed and RO (reverse osmosis) feed water.

\*\* With Sub-micron or UF (ultrafiltration) Filter Cartridge installed as specified.

Note: Specifications are based on a RO feed with recirculation.

## PURELAB® Option-S Water Purifiers

The PURELAB® Option-S System combines pretreatment, reverse osmosis, and ionic/organic removal in a single unit to deliver better than single distilled quality water from a potable water source. With 4 models to choose from, the PURELAB® Option-S System is ideally suited for general laboratory analyses and as pretreatment to ultrapure water polishing units.

### Standard Features and Benefits

- Up to 10 Megohm purity water
- Easy front loading cartridges
- Cartridge change indicator
- Microprocessor controlled system management with continuous water quality monitoring
- Data collection capabilities through RS232 interface
- Adjustable audio-visual alarms
- Upgradable to higher flow rates
- Wall or bench mountable
- Supplied complete with all consumables

### PURELAB® OPTION-S SYSTEM SPECIFICATIONS

#### Performance Specifications

MODEL	Resistivity MΩ-cm	TOC (ppb)	Bacteria* CFU/ml	pH	Flow Rate LPH @ 25° C
PURELAB Option-S 7/15	1–10	<30	NA	Neutral	7 or 15
PURELAB Option-S 30/60	1–10	<50	<1	Neutral	30 or 60

\* Based on regular sanitization and proper maintenance of the system

#### System Dimensions

MODEL	HxWxD (in)	Weight (lbs)	Power Requirements
PURELAB Option-S 7	18.2x16.2x8.3	29.8	110–240 V 50- 60 Hz

Note: Installation kit is supplied with DV Reservoirs

## PURELAB® Option-R Water Purifiers

The PURELAB® Option-R System features all the technologies of the S series units with the added benefit of an integral recirculation feature to deliver better than double distilled quality water from a potable water source. The PURELAB® Option-R System is ideally suited for standard laboratory techniques and as pretreatment to ultrapure water polishing units where TOC is a concern.

### Standard Features and Benefits

- 10 to 15 Megohm purity water
- Easy front loading cartridges
- Cartridge change indicator
- Microprocessor controlled system management with continuous water quality monitoring through unique GRID display (Option-R 7/15)
- Data collection capabilities through RS232 interface
- Adjustable audio-visual alarms
- Upgradable to higher flow rates
- Wall or bench mountable
- Supplied complete with all consumables

### PURELAB® OPTION-R SYSTEM SPECIFICATIONS

#### Performance Specifications

MODEL	Resistivity MΩ -cm	TOC* (ppb)	Bacteria* CFU/ml	pH	Particulates	Flow Rate LPH @ 25° C
PURELAB Option-R 7/15	10 to >15	<20	<1	Neutral	>0.2 μm	7/15

## PURELAB® Option-Q Water Purifiers

The PURELAB® Option-Q System produces ultra pure water without the need for a pre-purified feed supply. Available in two models depending on flow rate requirements, the PURELAB® Option-Q System delivers up to 18 Megohm water on demand direct from tap making it a cost effective choice for the laboratory.

### Standard Features and Benefits

- Up to 18.2 Megohm water from tap
- Cartridge change indicator to ensure optimal performance
- Easy front loading cartridges
- Adjustable audio-visual alarms for consumable change-outs
- RS232 interface for easily downloaded data collection
- Compact Design
- Comes complete with all consumables

### PURELAB® OPTION-Q SYSTEM SPECIFICATIONS

#### Performance Specifications

MODEL	Resistivity at 25°C	TOC (ppb)	Bacteria* CFU/ml with POU Filter (optional)	pH	Particulates POU Filter (optional)	Flow Rate LPH@25°C

Reservoir is required with Option-Q unit (sold separately)  
All units come complete with installation kit and full set of cartridges

## PURELAB® Prima 7/15/20 Reverse Osmosis Systems

PURELAB® Prima reverse osmosis water purification systems deliver Type III/IV primary grade water from a tap feed. All models continuously monitor and display water quality and operational parameters, ensuring a constant supply of pretreated quality water. Prima systems are ideal as pretreatment to ultrapure water polishers or for routine glassware washing.

### Standard Features and Benefits

- Advanced high flux TFC membranes
- Easy front loading cartridges
- Cartridge change indicator
- Microprocessor controlled system management with continuous water quality monitoring through unique GRID display
- Data collection capabilities through RS232 interface
- Adjustable audio-visual alarms
- Upgradable to higher flow rates
- Wall or bench mountable
- Supplied complete with all consumables

## PURELAB® Prima 30/60/90/120 Reverse Osmosis Systems

Designed to meet your higher water volume requirements, PURELAB® Prima reverse osmosis water purification systems provide primary grade water from a tap feed at flow rates up to 120 liters per hour. With a built-in integral booster pump, PURELAB® Prima reverse osmosis systems are ideal as pretreatment to feeding autoclaves, dishwashers or for use in environmental cabinets.

### Standard Features and Benefits

- Auto rinse capability
- Wall or bench mountable
- Low energy consumption
- Microprocessor based management system
- Integral pretreatment
- Performance indicators
- Upgradable to higher flow rates
- Supplied complete with all consumables

## CENTRA® Packaged Central Laboratory Water Systems

The Centra® Lab Central Water System combines purification, storage and distribution in a single cabinet. The compact system design incorporates, RO, UV, filters, pump and reservoir in one unit. Purified water is distributed via a loop to multiple labs and points of use in a building.

### Standard Features and Benefits

- Flow rates of 5 gpm and 10 gpm
- Consumable change reminders
- Feeds multiple floors, faucets, polishers, glassware washers, autoclaves and sterilizers in a facility
- Water leak detection to prevent lab flooding
- Compact design for space utilization
- Easy connection to Building Management System (BMS)
- Validatable

## MEDICA® 7/15 Water Systems (Models S/R/D) for Clinical Analyzers

Compact system utilizing pretreatment, RO, deionization, UV photo oxidation and in-line microfiltration technologies to produce CLSI (Clinical Laboratory Standards Institute) Type I water to feed chemistry and immuno-diagnostic analyzers. Available in recirculating model - MEDICA® R, degassing model - MEDICA® D or standard MEDICA® Systems.

### Standard Features and Benefits

- 1 to 15 Megohm purity water
- Flow rates from 7 lph to 15 lph
- Easy front loading cartridges
- Microprocessor controlled system management with continuous water quality monitoring through unique LCD display
- Adjustable audio-visual alarms and cartridge change indicator
- RS232 port for water quality data collection for compliance with GLP
- Models available with a degassing feature (MEDICA® D 7/15)
- Recirculating models available to ensure consistent purity
- System includes all cartridges

## MEDICA® Pro 30/60/120 Water Systems (S/R/RE) for Clinical Analyzers

The MEDICA® Pro line of water purification systems is available in four models to meet CLSI Type I water standards for clinical analyzers. The system incorporates an integral 50 liter storage reservoir, RO, DI purification, UV photo-oxidation and ultra-microfiltration technologies.

### Standard Features and Benefits

- Xport USB device for easy download of system performance data to comply with GLP guidelines
- Unique space saving design
- Upgradable for higher flowrates
- High capacity Protek deionization cartridges
- Special E-cartridge to reduce CO<sub>2</sub> and prolong the life of the DI packs
- Leak detection with auto shut down - minimizing the risk of flooding
- Emergency by-pass loop provides an uninterrupted supply of pure water in an emergency

### Consumables and Accessories

UV lamp 254nm (destroy bacteria and help to reduce TOC levels)	LC105
Ultra Microfilter 0.05 um	LC109
Medpure L1 DI (Deionization) high capacity cartridge	LC174
Protek L1 (high capacity adsorption pretreatment cartridge - standard size)	LC175
Protek L2 (high capacity adsorption pretreatment cartridge - Large size)	LC177
RO (reverse osmosis) cartridge 30 lph High flux reverse osmosis membrane	LC179
RO cartridge 60 liter per hour High flux 30 liter per hour reverse osmosis membrane	LC180
E-cartridge (Reduce CO <sub>2</sub> levels to extend Medpure DI cartridge)	LC181
Sanitization tablets (12 pk)	CT3
Composite vent filter (maintain bacterial integrity of reservoir)	LC136M2
MEDICA Pro - Starter Kit 1 (install kit, Protek L1, Medpure L1, 3 sanitization tablets)	LC188
MEDICA Pro - Starter Kit 2 (install kit, Protek L2, Medpure L1, 3 sanitization tablets)	LC189
Analyzer Feed pump 115V 60Hz	LA632
High Flow Upgrade Kit for 2nd Medpure DI cartridge (includes fittings and 1 Medpure DI cartridge)	LA700
E-cartridge Upgrade Kit	LA701
Castors (useful for under bench installations also)	LA704 USA

Note: Cartridge starter kit must be ordered with MEDICA Systems.

## MEDICA® R-200 Water Purification System for High Volume Clinical Analyzers

Integrated water purification system designed to provide a purified water supply to high volume clinical analyzers and laboratories with multiple analyzers. The MEDICA® R-200 System combines storage, purification and distribution in a single cabinet.

### Standard Features and Benefits

- Delivers up to 21 lpm of CLSI type 2 water purity
- Incorporates storage reservoir, UV, 0.2µm filter and RO technologies in one unit
- Leak detection with auto shut-down prevents flooding
- Full validation support documentation available to comply with regulatory standards
- RS232 interface to record system performance for GLP
- Integrated by-pass loop ensures a constant water supply in an emergency

### MEDICA® R-200 SYSTEM SPECIFICATIONS

#### Performance Specifications

MODEL	Resistivity MΩ-cm @ 25° C	TOC (ppb)	Silica ppm	Bacteria* CFU/ml	Particulates	pH	Dispense Flows to analyzer	Make-up Flow Rate
MEDICA R-200	>10	<30	<0.05	<10	<0.2 µm	Effectively Neutral	Up to 21 L/min	200 liters per hour

\* Subject to correct operating and maintenance procedures

#### System Dimensions

MODEL	HxWxD (in)	Operational Weight (lbs)
MEDICA R-200	71.7x28.75x35.0	1190.0

#### Feed Water Parameters

MODEL	Source	Maximum FI*	Conductivity µS/cm (max)	Free Chlorine (ppm)	Temperature	Pressure Maximum (psi)	Pressure Minimum (psi)
MEDICA R-200	Potable	5	1000	<0.2	5–35° C	60	30

\* Fouling Index

## MEDICA® R-200 Water Purification System for High Volume Clinical Analyzers

### MEDICA® R-200 SYSTEM ORDERING INFORMATION

MODEL	Catalog Number
MEDICA R-200 (230 volt 50 Hz)	MR200DSM1-230
MEDICA R-200 (115 volt 60 Hz)	MR200DSM1-115

### Consumables and Accessories

RO Particle Pretreatment Filter	LC159
UV Lamp	LC158
In-line 0.2 µm Filter	LC160
Composite Vent Filter	LC156
Sanitization Solution (4 x 1000 ml)	B10000209

## Portable Laboratory Deionization Systems

The lab wall-mountable deionization systems produce flow rates of 30 to 90 liters per hour of high purity water. These systems are a cost effective alternative for small volumes of deionized water. Built in meter, color change indicators and optional resistivity meters make it easier to monitor your water quality.

### B114 Deionizer

- Disposable cartridge system enables a quick and easy exchange when cartridge is exhausted
- Battery operated wall mountable system with color coded resistivity meter displays water quality

### Vision 125 & 250 Deionizers

- Color change indicators allow users to monitor when resin exhausts and change out is required
- Optional dispense gun can be connected to either system

### Micromeg Deionizer

- Choice of either disposable or exchangeable deionization cartridge
- Battery operated wall mountable system with color coded resistivity meter displays water quality

## LDIRS Deionization Recirculating Systems

Siemens Water Technologies LDIRS Series water purification systems deliver up to 4 gpm (15 lpm) of deionized water. The system is available in two models.

### LDIRS03

A compact, wall mountable panel capable of supplying up to 3 gpm (11 lpm) deionized water to a small distribution loop up to 100 linear feet in length

### LDIRS04

A larger skid mounted system capable of supplying up to 4 gpm (15 lpm) of deionized water to a larger distribution loop up to 500 linear feet in length.

NOTE: Flow rates dependent upon size and length of distribution piping loop.

#### System Standard Features:

- Dual Filtration: 1.0 micron pre-filtration and 0.2 micron final filtration
- Continuous recirculation through all post treatment components including UV sterilizer and 0.2 micron final filtration
- Bacteria destruct ultraviolet sterilizer (254 nm)
- Built-in GFCI protection

#### System Benefits:

- Flow rates up to 4gpm
- Easy Installation
- Both wall panel and skid mounted system have small footprint to conserve space (additional space required for SDI components)

### System Specifications

Model	Flow Rate (max)	Feed Water Pressure	Feed Water Temp.
LDIRS03	3 gpm (11 gpm)	min. 40 psig (2.7 bar) max. 90 psig (6.2 barA)	min. 50° F (10° C) max. 90° (32° C)
LDIRS04	4 gpm (15 gpm)	min. 40 psig (2.7 bar) max. 90 psig (6.2 barA)	min. 50° F (10° C) max. 90° (32° C)

### System Dimensions

Model	Electrical	Overall Dimensions (cm)	Frame Materials	Piping Materials
LDIRS03	115VAC grounded receptacle	38 (86) L x 9 (23) D X 40 (102) H	White Polyethylene	S-80 PVC and Polyethylene Tube
LDIRS04	115VAC grounded receptacle	30 (76) L x 24 (61) D X 65 (165) H	Powder Coated Carbon Steel	S-80 PVC

### Ordering Information:

LDIRS Deionization Recirculation System, 3 gpm per minute max. (11 lpm max.) **LDIRS03**

LDIRS Deionization Recirculation System, 4 gpm per minute max. (15 lpm max.) **LDIRS04**

## Service Deionization (SDI) Systems

### Choose from a Wide Range of Deionizers and Carbons

**Cation-bed Deionizers** have a high capacity for removing positively charged, dissolved ionic contaminants, such as calcium, sodium, magnesium, potassium, iron and manganese. The durable gel resins provide stability against osmotic, thermal and impact shock.

**Anion-bed Deionizers** have a high capacity for removing negatively charged dissolved ionic contaminants such as carbonate, bicarbonates, sulfates, chlorides, nitrates and silica. The durable gel resins used are stable against osmotic, thermal and impact shock. A variety of anion resins are available, suitable for virtually any water application.

**Mixed-bed Deionizers** provide higher quality, and a more neutral pH than separate bed systems, as well as enhanced silica and CO<sub>2</sub> removal. Our units are guaranteed to produce the quality of water required for any removal application, up to 18 megohm-cm resistivity at 25° C. In-line quality monitors immediately alert users when resin tanks need to be changed.

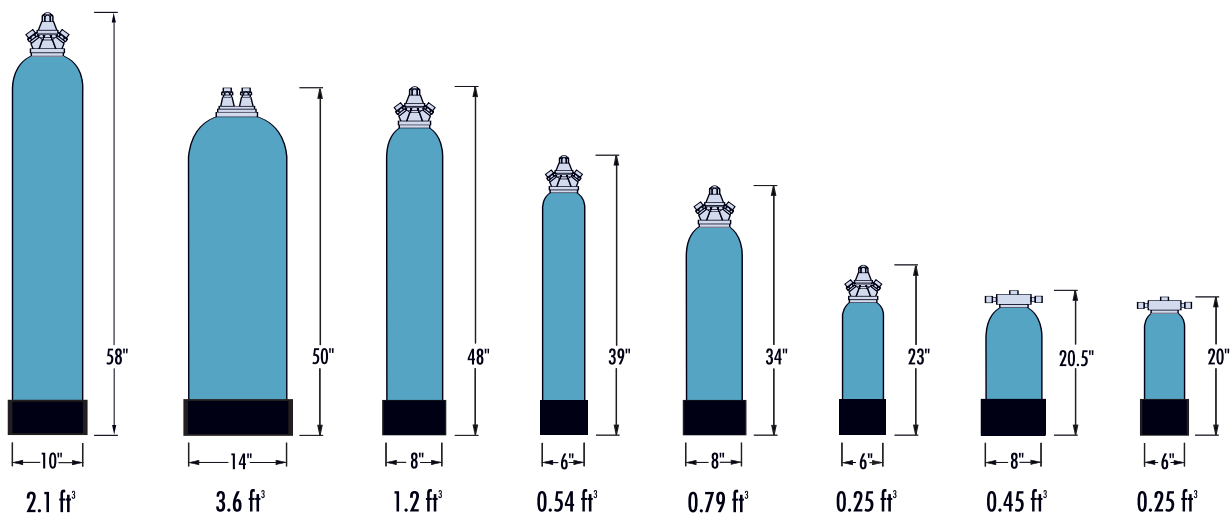

**Ultra Mixed-bed Deionizers** provide superior silica removal and significantly lower TOC levels. Ideal for microelectronics and pharmaceutical applications where stricter controls of critical contaminants are required.

**Macroporous Organic Scavenger Resins** offer extra-large internal surface areas and can therefore provide higher adsorption of dissolved and undissolved organic contaminants. The strongly basic anion resins will remove not only those organic ions normally removed by standard anion exchange, but those that would normally pass right through most demineralizers.

**Colloidal Scavenging Deionizers** have a high capacity for removing inorganic and organic anions. The durable, macroporous resins are extremely resistant to organic fouling, and effectively remove colloids.

**Activated Carbon Units** remove chlorine and some dissolved organic contaminants. Each replacement carbon unit contains virgin carbon to assure maximum water quality and service life of the bed (no regenerated carbon is ever used in our units.)

**GMP Tanks for dialysis and validated processes are also available.**

## Service Deionization (SDI) Systems

Economical, high purity portable deionization resin tanks are designed to deliver up to 18 Megohm water quality from potable feed water. Custom configured to meet your water purity requirements, flow rate and budget.

### STANDARD FEATURES AND BENEFITS

- Achieve up to 18 Megohm purity water from a potable source
- Choice of industrial grade or premium (type I or type II) grade resins
- GMP regenerated ion exchange resin assures absolute ionic purity
- Manufacturing process is batch controlled to ensure consistent quality
- Available in eight tank configurations from 0.25 cubic feet to 2.1 cubic feet
- Designed for high capacity applications requiring up to 150 gpm or higher when used in parallel

### SDI SPECIFICATIONS

Tank Size	Resin Volume (Ft <sup>3</sup> )	Flow Rate GPM	H x W x D (in)	Tank Inlet/Outlet Connection Size	Weight (Resin & Water in lbs.)

### Applications

General lab use

Pretreatment to ultrapure water systems

Pharmaceutical applications

Semiconductor applications

### Ordering Information

SDI is flexible and can be customized to meet your needs. Contact Technical Support at 800.875.7873 x5000 to discuss your requirements and to arrange for a site visit and water analysis.

FAUCETS-Bench mounted with under counter connections are available as an accessory. See page 36.

## Laboratory Disposable Deionization (DI) System

Disposable alternative to SDI tanks. This system is a floor mounted 0.25 cubic foot cartridge housing and cartridge combination. It is designed to provide pretreated water to a wide range of water treatment applications. Similar to SDI tanks these disposable cartridges are available in carbon media, mixed bed, cation, and anion resins.

### For use in:

- General laboratory use
- Food or beverage processors
- Electronics and chemical industries
- Hospitals and Universities
- Pretreatment to Ultrapure water systems

### Standard Features and Benefits

- Produces up to 18 megohm water from a potable source
- Max flow: up to 2 gpm (8 lpm)
- Easy top-loading cartridge with o-ring seal
- Many choices of resin media options
- Easy cartridge replacement with minimal spillage
- Housing comes tested with 3/4" unions attached
- Multiple housings can be arranged in parallel or series to meet the flow required

### Specification: (housing)

Filter housing: 0.25 cubic feet (7 liters) Housing w/ FDA EPDM o-ring.  
3/4" bottom inlet/outlet

## Modular Docking Vessels DV 25 and DV 35

The new DV 25 and DV 35 docking vessels are state-of-the-art high purity water storage reservoirs specially designed to accommodate the PURELAB® Ultra, Option, Prima and MEDICA® water purification systems. The L-shaped docking vessels are designed as a base for the water purification system, resulting in one integral, compact unit, that eliminates the need for a separate reservoir and saves valuable bench space.

### Standard Features and Benefits

- Smooth internal surfaces with no crevices to harbor bacteria
- Inert polyethylene construction minimizes possibility of contamination of stored water
- Sloping, self-draining base provides more complete sanitization and quicker rinse-out time
- Recirculation capability combined with composite vent filter prevents ingress of airborne bacteria and reduces CO<sub>2</sub> levels and volatile organics within the reservoir
- Built-in dispense tap (DV 35 version only)
- Docking station design means no unsightly exposed interconnecting tubing or wiring for mistake-free operation
- Simple “plug-in” connections allow easy connection to the water purification system
- Reservoir water level indicator
- Wall or bench mountable

## Stand Alone Storage Reservoirs

Easy-to-use reservoir specially designed for the storage of purified water. Fully wall-mountable to save valuable bench space.

### Standard Features and Benefits

- Inert polyethylene construction minimizes the risk of organic leachables
- Fully opaque to avoid algal growth
- Integrated 5-level switch control to allow automatic fill-up of reservoir by lab water system
- Sloping base allows complete drainage of water from reservoir
- Composite vent filter eliminates contamination of water from CO<sub>2</sub>, volatile organic compounds or airborne bacteria
- Available in 3 convenient sizes — 25 liter, 40 liter and 75 liter
- Designed for use with PURELAB® systems

### RESERVOIR SPECIFICATIONS

MODEL	HxWxD (in)	Weight (lbs)	Useable Volume

## Polypropylene Carboys

Convenient polypropylene carboys for storage of high purity water. Carboys come with or without spigot for ease of use. Large handles provide easy transportation in the lab.

- Steam autoclavable at 121° C
- Large handles help with pouring and carrying
- Front spigot for easy dispensing

### Ordering Information

Part #	Description
CARBOYPP2	Carboy 2.5 gal (10L) PP without spigot, autoclavable
CARBOYPP5	Carboy 5 gal (20L) PP without spigot, autoclavable
CARBOYPP2SP	Carboy 2.5 gal (10L) PP with spigot, autoclavable
CARBOYPP52SP	Carboy 5 gal (20L) PP with spigot, autoclavable

## Polypropylene Faucets

Designed for easy dispensing of deionized or distilled water where high purity is required. Reduces the risk of bacteria.

- Laboratory faucets are available in countertop and wall mounted style
- Available with integral vacuum breakers
- Recirculating faucet available
- Made from pure unpigmented polypropylene

### Ordering Information

Part #	Description
LFSPRF1PP	Polypro recirculating faucet, deck mount gooseneck

## TOTAL-CHECK™ 900 TOC (Total Organic Carbon) Monitor

The Total-Check™ 900 TOC monitor provides a total picture of water quality. This stand alone unit can be used with any lab water purification system to continually measure the levels of organic substances in high purity water at the systems' dispense. Total-Check™ 900 offers quick, accurate, easy to read measurements of water quality being produced.

- 1-999 ppb TOC levels
- Calibration services available
- Easy to read, single LCD screen
- Dual wavelength 185/254nm UV lamp

### PERFORMANCE

Operating Range:	1-999 ppb TOC
Display Resolution:	single ppb increments
Repeatability:	+/-5%
Accuracy:	+/-15% or +/- 1 ppb (whichever is greater)

### WATER SAMPLE:

Inlet Pressure:	70 psi MAX (4.8 bar)
Temperature:	5 to 35°C (41-95°F)
Resistivity:	15MΩ-cm@25°C *

\* May also be use with sample resistivity between 5 and 15MΩ-cm@25°C, repeatability and accuracy levels will be lower.

### SPECIFICATIONS:

Operating Temperature:	15 to 30°C
Operating Weight:	4.2lbs (1.9kg)
Height:	9.3 inches (237 mm)
Width:	6.1 inches (155 mm)
Depth:	5.9 inches (150 mm)
Electrical:	100-230V /50-60Hz

### ORDERING INFORMATION:

UE Model	TM900ME01

### CONSUMABLES / ACCESSORIES:

Replacement UV Lamp:	TM900M001
Inlet / Outlet tubing:	TMFTPF04949
Tube Tubing 25':	TMFTPF04945
Luer Fittings (5 pk):	TMFTPF04950

## Remote Control Stations

Remote user interface for the PURELAB® Prima, PURELAB® Option and MEDICA® water purification systems. Easy to use, mountable unit fully replicates the GRID (graphically intuitive display) panel providing constant water system monitoring capabilities from a remote location.

### STANDARD FEATURES AND BENEFITS

- Replicates GRID display monitor on water purification system
- Easy to read display with icons and graphical representation of the process flow
- Audio visual alarms to alert user when consumables need replacing or when reservoir water level is low
- Provides parallel display capabilities to simultaneously display system parameters from 2 different locations
- RS232 port for connection to a printer for easy data collection of water quality and system performance for compliance with GLP guidelines
- Compact size fits in any location
- Wall, bench, panel, or furniture mountable offers flexibility and convenience

### REMOTE CONTROL STATION SPECIFICATIONS

Weight (lbs)	H x W x D	Temperature	Maximum Distance from Water System (Ft)
2.2	4.75 x 7.90 x 2.75	5° C – 40° C	24.6

## Remote Dispense Gun

Premium dispense gun allows dispensing of purified water from a remote location. Ergonomic design and push and lock dispense mechanism provides comfort and drop-by-drop control of purified water while filling laboratory containers.

### STANDARD FEATURES AND BENEFITS

- Ability to dispense up to 6 1/2 feet from the water purification system at a flow rate up to 1.5 lpm
- Can be operated with optional point of use filter
- Integral recirculation capability up to point of dispense when used with a water system with recirculation pump
- Drop-by-drop dispense control for greater dispensing accuracy
- Push back and lock dispense mechanism allows hands-free operation
- Wall mountable

### REMOTE DISPENSE GUN SPECIFICATIONS

## Point-of-Use High Purity Water Capsule Filters

Designed to provide absolute filtration at point of dispense on laboratory ultrapure water systems or after standard service deionization systems. Disposable design makes filtration easy and convenient.

### Standard Features and Benefits

- Available in 0.1 µm or 0.2 µm pore size ratings
- Two convenient sizes — 500 cm<sup>2</sup> and 1000 cm<sup>2</sup> effective filtration area
- Hydrophilic polyethersulfone bacterial retentive membrane—based on *Pseudomonas diminuta* challenge (HIMA)
- Integrity tested and validated, making them ideal for pharmaceutical and microelectronics applications
- Low extractable welded housing and materials—no adhesives or glues
- Non-pyrogenic per USP and LAL testing

## IWT® Cartridge Filtration System

Convenient, economical, high quality modular water filtration system that operates on city water pressure and can easily be expanded to fit most needs. No electricity required. Up to 18 Megohm water quality can be achieved with this system.

### Standard Features and Benefits

- Consistent source of high quality water at 50% the cost of distilled water
- Removes organics, phosphates, chlorine, and essentially all ionizable constituents from water supply
- Convenient color change resin to indicate resin exhaustion
- Quick and easy installation
- No instruments needed
- Water quality up to 18 megohm-cm resistivity can be achieved
- Flexible system configuration to meet specific needs

### SPECIFICATIONS

Cartridge	Flow Rate GPH	Capacity (grains as CaCO <sub>3</sub> )	Dimensions	Shipping Weight	Maximum Operating Pressure (psi)
Adsorber	7.2	NA	3 1/2"x19 3/4"	6 lbs single/36 lbs six pack	30
Metex	7.2	3200	3 1/2"x19 3/4"	6 lbs single/36 lbs six pack	30
Universal	7.2	1600	3 1/2"x19 3/4"	6 lbs single/36 lbs six pack	30
Research	7.2	1000	3 1/2"x19 3/4"	6 lbs single/36 lbs six pack	30

### Cartridge Removal

Adsorber	For pretreatment of water containing organics, free chlorine, phosphate complexes, and turbidity.
Metex	For removal of all metallic ions to a level of 1% of the influent concentration. Removes ammonia and other cations from condensate samples.
Universal	Reduces ion concentration to a level obtainable by single distillation. All ionizable constituents are removed except free carbon dioxide and silica.
Research	Reduces ion concentration to a level obtainable by triple distillation. Essentially all ionizable constituents including silica and free carbon dioxide are removed.

### Applications

Environmental and humidity chambers
Recharging lead and acid batteries for cars, fork lifts, etc
Electronic cleaning equipment (with 99% isopropyl alcohol bath to wash solder trails and flux off circuit boards)
Steaming devices used in food industry
Photo processing and printing applications
Humidifiers (including computer room humidifiers)
Ice Machines
Hydroponics

## Replacement Cartridges for Laboratory Water Purification Systems

Cartridges provide ultra-high-purity water for use with MODULAB®, PURELAB®, Millipore® and Barnstead® water systems. The wide selection of cartridge styles and types allows custom-configuration of your laboratory water system to meet a variety of application needs.

### Standard Features and Benefits

- Higher ion exchange capacity than other manufacturers' cartridges
- Lower cartridge replacement costs
- Unique diffuser design for even distribution of water and maximum cartridge life
- Vacuum packaging for maximum shelf life
- Ultrasonic-welded seams and joints for extractable-free product water
- Date coded for critical quality control
- GMP cartridge manufacturing facility
- Patented downflow design maximizes removal efficiency and cartridge capacity

### We offer the following types of resin:

**Activated Carbon** Used for pretreating tap water before deionization. Removes traces of chlorine and organics through adsorption.

**Colloidal Removal Resin** Removes colloids and bacteria by ion exchange and adsorption. Protects and enhances performance of deionization resin, and extends final filter life.

**Cation Exchange Resin** Removes positively charged impurities. When used alone, this resin will lower solution's pH. Usually used in conjunction with anion resin in a mixed bed ion exchange cartridge.

**Anion Exchange Resin** Removes negatively charged impurities. When used alone, this resin will raise a solution's pH.

**Oxygen Removal Resin** Removes oxygen and prevents corrosion in water cooling loop applications. For use on feed water containing less than 10 ppm ionized solids.

**Mixed Bed Ion Exchange** Contains a mixture of cation and anion resins in a mixed bed to purify water up to 18.2 megohm-cm. Used to polish pretreated water, or to produce high-purity water in a loop system.

**Organic Scavenger/Removal Resin** Removes trace organics from deionized water to less than 10 ppb TOC.

**High Capacity Ion Exchange** Combines anion and cation resin in a 2-bed configuration. Used for purifying large quantities of water at a lower purity level than provided by mixed bed deionization. May also be used to pretreat mixed-bed cartridges for longer cartridge life.

### Custom Cartridges

Specialty resin cartridge configurations are available to meet your needs. Call our technical service department for more information. Minimum order volumes apply.

## Replacement Cartridges for Siemens Water Technologies, USFilter® and ELGA® Laboratory Water Systems

### PURELAB® Ultra Water System Cartridges

Ultra-microfilter	LC109
Point-of-Use Filter	LC134
Purification Pack-RO Feed (for MK1 Ultras)	LC147
Purification Pack-SDI Feed (for MK1 Ultras)	LC148
Purification Pack-Low Ionic (for MK1 Ultras)	LC149
Purification Pack-Low TOC (for MK1 Ultras)	LC150
Ultrafilter (5,000 MWCO)	LC151
Labpure S1 DI cartridge - RO feed	LC182
Labpure S2 DI cartridge - SDI feed	LC183
Labpure S3 DI cartridge - Low Ionic	LC184
Labpure S4 DI cartridge - Low TOC	LC185

### PURELAB® Classic Water System Cartridges

Purification Cartridge (For MK1 Classic)	LC162
Ultra Filter 5000 mwt	LC169
Purification Cartridge (For MK1 Classic)	LC126
Endoguard 5000 MWCO UF Cartridge (For MK1 Classic)	LC151
Final Filter 0.2 µm (1/pk)	LC134
Labpure S5 purification cartridge	LC186

### PURELAB® UHQ Water System Cartridges

Reverse Osmosis Cartridge	UHQ5
Ultra Microfilter Cartridge 0.05 µm	LC109
UHQ Purification Pack (2 Organic Absorption Cartridges and 2 Ion Exchange Cartridges)	UHQPACKA
Composite Vent Filter	UHQ4

### PURELAB® Option Water System Cartridges

Pretreatment Cartridge (Option 7 & 15)	LC140
Pretreatment 5 micron Carbon Filter (Option 30 & 60)	LC123
Purification Cartridge (Option R&S 7 & 15)	LC141
Purification Cartridge (Option-Q 7 & 15)	LC163
Purification Cartridge (Option 30 & 100)	LC114
RO Module (7.5 liter/hour) — (Option 7 & 15)	LC143
RO Module (30 liter/hour) — (Option 30)	LC115
RO Module (60 liter/hour) — (Option 60)	LC119
Point-of-Use Filter (Option 7 & 15-R)	LC145
Point-of-Use Filter (Option 30 & 60-R)	LC106

### PURELAB® Prima Water System Cartridges

Pretreatment Cartridge (PURELAB Prima 7/15/20)	LC140
Pretreatment 5 Micron Carbon Filter (Prima 30/60/90/120)	LC123
RO Module (7.5 liter/hour) — (Prima 7/15/20)	LC143
RO Module (30 liter/hour) — (Prima 30)	LC115
RO Module (60 liter/hour) — (Prima 60, 120)	LC119
RO Module (Prima 90)	LC120

# Replacement Cartridges for Siemens Water Technologies, USFilter® and ELGA® Laboratory Water Systems

## PURELAB® Plus Water System Cartridges

PURELAB Purification Quadpack w/0.2 µm Final Filter	PLC6000
PURELAB Purification Quadpack	PLC5000
Endoguard 5000 MWCO UF Membrane Cartridge	LC151
Final Filter 0.2 µm (1/pk)	LC134

## MEDICA® Water System Cartridges

Pretreatment Cartridge (Medica 7/15)	LC140
5 µm Carbon Filter (Medica 30/100)	LC123
Purification Cartridge (Medica 7/15)	LC141
Purification Cartridge (Medica 30/100)	LC114
RO Module (Medica 7/15)	LC143
RO Module (30 lph)	LC115
RO Module (60 lph)	LC119
RO Module (100 lph)	LC137
In-Line 0.2 µm Filter (Medica 7/15)	LC125
In-Line 0.05 µm UMF Filter (Medica 30/100)	LC109

## MEDICA® Pro Water System Cartridges

0.05µm ultra microfilter	LC2109
Medpure L1 DI (Deionization) high capacity cartridge	LC174
Protek L1 (high capacity adsorption pretreatment cartridge - standard size)	LC175
Protek L2 (high capacity adsorption pretreatment cartridge - Large size)	LC177
RO (reverse osmosis) cartridge 30 lph High flux reverse osmosis membrane	LC179
RO cartridge 60 lph High flux reverse osmosis membrane	LC180
E-cartridge (Reduce CO <sub>2</sub> levels to extend Medpure DI cartridge)	LC181
Castors (for easy mobility)	LA704USA

## MEDICA® R-200 Water System Cartridges

RO Pretreatment Filter	LC159
In-line 0.2µm Filter	LC160
Composite Vent Filter	LC156
Bacterial Vent Filter	LC157

## CENTRA® Water System Cartridges

Bacterial Filter	LC157
Composite Vent Filter	LC156
0.2µm Filter	LC160
RO Module	LC161
Pretreatment Filter	LC159

## MODULAB® High Flow System Cartridges

Carbon Cartridge	MLHF20CAR1
Organic Removal Cartridge	MLHF20OS01
0.05µm Micro Ultra Filter	MLUF020S05
0.2µm Bacteria Filter	MLUF020S2

## Replacement Cartridges for Siemens Water Technologies, USFilter® and ELGA® Laboratory Water Systems

### MODULAB® Water System Membrane Cartridges

10" RO Membrane (TFC)	DIRO3002
20" RO Membrane (TFC)	DIRO3222
10" UF Membrane (10,000 MWCO)	UFPW3308T
10" UF Membrane (40,000 MWCO)	DIUF8102
20" UF Membrane (40,000 MWCO)	DIUF8202

### MODULAB® Water System Resin Cartridges

10" Mixed Bed Cartridge (1/pk)	DIMN1000-1
20" Mixed Bed Cartridge (1/pk)	DIMN2000-1
10" Organic Cartridge (1/pk)	DIOR1000-1
20" Organic Cartridge (1/pk)	DIOR2000-1
10" Pureone Cartridge (1/pk)	DIMBS1000
10" Separate Bed DI (1/pk)	DISB1000-1
20" Separate Bed DI (1/pk)	DISB2000-1
12" Mixed Bed Cartridges (1/pk)	DIMM1200-1
12" Mixed Bed Cartridges (2/pk)	DIMM1200-2

### MODULAB® Carbon Cartridges

10" Carbon Cartridge (1/pk)	DICR1000-1
10" Carbon Cartridge (4/pk)	DICR1000-4
20" Carbon Cartridge (1/pk)	DICR2000-1
10" Pretreatment Carbon Cartridge/5 µm Prefilter	LBCPT1002
20" Pretreatment Carbon Cartridge/5 µm Prefilter	LBCPT2004

### MODULAB® Water System Cartridge Kits

Modulab Cartridge Kit for RO Feed – Contains 1 EA CWCF23110,2 EA DIMN1000-1, 1 EA DIOR1000-1, 1 EA CW3750 Final Filter	LBMP1006
Modulab Cartridge Kit for DI Feed – Contains 1 EA DICR1000-1, 2 EA DIMN1000-1, 1 EA DIOR1000-1, 1EA CW3750 Final Filter	LBMP1005
Modulab UV/UF Start Up Kit 20" – Contains (1) 20" UF Membrane (40,000 MWCO), (1) 0.1 µm Capsule Filter	UFSU8202
Modulab Clinical Cartridge Kit	LBCCK1002

### Miscellaneous Laboratory Cartridges

Mixed Bed 10" cartridge PVC P-154	DIMNP154
Mixed Bed 10" cartridge	DIMN4000
Mixed Bed 10" cartridge with porex disc, 4 pack	DIMN1000-4PD
Mixed Bed 5" cartridge with porex disc	DIMN0500-PD
Anion Cartridge 10"	DIOH4000
Anion/Cation separate Bed 5" cartridge	DISB0500
Anion/carbon separate Bed 10" cartridge	DIOH4010

## LiquiPure® Replacement Cartridges for Millipore® Laboratory Water Systems

### LiquiPure® 1 Replacement Cartridges for Milli-Q® and Alpha-Q™ Laboratory Water Systems

The LiquiPure1 replacement cartridges for Milli-Q and Alpha-Q laboratory water systems provide ultra-high-purity water with very low TOC and extractable levels. The cartridge contains a variety of purification media to remove specific types of feed water contaminants. All wetted parts are constructed of all-natural polypropylene to minimize extractables, while a unique downflow design ensures optimum removal of organic and inorganic impurities. A pigmented polypropylene exterior prevents light from penetrating to minimize microbial growth. Cartridge contains macroreticular activated carbon, ultra-high-purity mixed bed ion exchange resin, and an organic scavenger.

ORDERING INFORMATION	Siemens Catalog Number	Millipore Equiv. Part Number
LiquiPure 1 Cartridge	LP1000	CPMQ004R1 CPMQ004D2
LiquiPure 1 Cartridge w/0.2 µm Final Filter	LP2000	CPMQK05R1 CPMQK05D2 CPMQK05RE
Final Filter 0.2 µm (1/pk)	LC134	MPGL04SK2

### LiquiPure® CLC Replacement Cartridges for Millipore® Analyzer Feed Systems

The LiquiPure CLC replacement cartridges for Millipore AFS Analyzer Feed systems provide high-purity water to feed laboratory clinical chemistry analyzers. The cartridge contains ultra-high-purity mixed bed ion exchange resin to produce NCCLS Type 1 quality water. All wetted parts are constructed of all natural polypropylene to minimize extractables, while the unique design ensures optimum removal of inorganic impurities. A pigmented polypropylene exterior prevents light from penetrating to minimize microbial growth. Cartridge contains ultra-high-purity mixed bed ion exchange resin.

ORDERING INFORMATION	Siemens Catalog Number	Millipore Equiv. Part Number
LiquiPure CLC Cartridge	LP3000	CP4ALLRES
LiquiPure CLC Cartridge	LP3000R	CP4ALLRES
LiquiPure CLC Cartridge	LP3000R & LP4000 FCCFH11S2	CPKITAFS2
LiquiPure CLC Cartridge	LP3000R FCCFH11S2	CPAFS04R1

### LiquiPure® RO Replacement Cartridges for Millipore Milli-RO® and AFS® Systems

These duplex RO pretreatment cartridges for Millipore Milli-RO and AFS Analyzer Feed systems includes granular activated carbon for chlorine removal, depth filtration for particulate removal and a food grade sequestering agent to protect the RO membrane from fouling and scale formation. Designed in a duplex configuration, the cartridge can be rotated and reconnected when one-half has been exhausted. All wetted parts are constructed of all natural polypropylene to minimize extractables, while the pigmented polypropylene exterior prevents light from penetrating to minimize microbial growth. Cartridge contains granular activated carbon, an anti-scaling agent and a prefilter.

ORDERING INFORMATION	Siemens Catalog Number	Millipore Equiv. Part Number

## Replacement Cartridges for Barnstead® Laboratory Water Systems

### Replacement Hose Nipple Cartridge Kits for Barnstead and Other Cartridge Housings

Description	Where Used	Barnstead Equip. Part Number	Siemens Catalog Number
1/2 Size, Mixed Bed Oxygen Removal	180 Grains as CaCO <sub>3</sub>	D8822	CW8822
High Capacity, 2 Bed	1650 Grains as CaCO <sub>3</sub>	D8901	CW8901
Mixed Bed	730 Grains as CaCO <sub>3</sub>	D8902	CW8902
Pretreatment	1450 Grains as NaCl to 1 megohm-cm Endpoint	D8921	CW8921
Organic Removal		D8904	CW8904
Mixed Bed (No Dye)	730 Grains as CaCO <sub>3</sub>	D8911	CW8911
Organic Removal, Mixed Bed	575 Grains as CaCO <sub>3</sub>	D8922	CW8922
2/3 Size, High Capacity Mixed Bed	1080 Grains as CaCO <sub>3</sub>	D8950	CW8950

Note: Hose Nipple Cartridges are non-pressure applications; outlet must be vented to atmosphere, minimum inlet pressure should be 5 psig (0.3 bar) and designed for 3/8" H.B. (9.5mm) connection.

## Total Service Offerings and Preventative Maintenance Program

Siemens offers full service and preventative maintenance programs for total peace of mind. When you take advantage of our proven service offerings you can reduce your lifetime product costs, extend the life of your laboratory systems and avoid costly downtime.

Over 80 company owned service centers in North America for rapid service response and personal attention.

Features:

- 24/7 call centers for emergency services
- Leasing programs available for the most modern lab systems
- Service deionization
- Full installation and start-up services
- Scheduled contracts for preventative maintenance
- Validation Support
- Customized Service Programs to fit your needs
- Complete documentation for record keeping and validation
- Spare part availability for lab water systems

# ASTM CLSI (formerly NCCLS) USP30

## AMERICAN SOCIETY FOR TESTING AND MATERIALS

### Standard Specifications for Reagent Water

ASTM Type	I	II	III	IV
Conductivity @ 25°C (micromhos/cm) . . . . .	0.056 . . . . .	1.0 . . . . .	0.25 . . . . .	5.0
Resistivity @ 25°C (Megohms-cm) . . . . .	18 . . . . .	1.0 . . . . .	4.0 . . . . .	0.2
Total Silica (µg/L) . . . . .	3 . . . . .	3 . . . . .	500 . . . . .	–
Total Organic Carbon (µg/L) . . . . .	100 . . . . .	50 . . . . .	200 . . . . .	–
Chlorides (µg/L) . . . . .	1 . . . . .	5 . . . . .	10 . . . . .	50
Sodium (µg/L) . . . . .	1 . . . . .	5 . . . . .	10 . . . . .	50
pH* . . . . .	– . . . . .	– . . . . .	– . . . . .	5.0-8.0

	Type A	Type B	Type C
Max Heterotropic Bacteria Count . . . . .	10/1000 mL . . . . .	10/100 mL . . . . .	100/10 mL
Endotoxin, EU/mL . . . . .	<0.03 . . . . .	0.25 . . . . .	N/A

\*The measurement of pH in Type I, II, and III reagent water has been eliminated because these grades of water do not contain constituents in sufficient quantity to alter pH.

## CLSI (CLINICAL LABORATORY STANDARDS INSTITUTE)

### Clinical Laboratory Reagent Water (CLRW)

#### CLSI

Resistivity @ 25°C (megohms-cm) . . . . .	10
Conductivity @ 25°C (micromhos/cm) . . . . .	0.1
Bacterial Growth (cfu/mL) . . . . .	10
Organics . . . . .	< 500 ppb
Particulate Matter . . . . .	0.22 µm Filter <sup>a</sup>

<sup>a</sup> The specification is a process specification, and not measured by the end-user.

## UNITED STATES PHARMACOPEIA 30 STANDARDS

### USP 30 Pharmaceutical Grade Water

Organics . . . . .	<0.5 ppm TOC
Conductivity . . . . .	<1.3 µS/cm at 25°C in-line measurement*
Endotoxin by LAL	
Purified Water . . . . .	No specification
WFI . . . . .	<0.25 EU/mL
Bacteria (guideline only)	
Purified Water . . . . .	<100 cfu/mL
WFI . . . . .	<10 cfu/100 mL

\*from equivalent values from USP Table for Conductivity Limits as a Function of Temperature.

**TO PLACE AN ORDER:****Contact:***Customer Service*

**Address:** Siemens Water Technologies  
10 Technology Drive  
Lowell, MA 01851

**Tel:** 800.822.7659

978.934.9349 ext.5001

**Fax:** 978.970.2465

**Hours:** 24 Hour Customer Service

**Online Ordering:** E-mail us at  
orderentry.water@siemens.com

**Terms:**

- Net 30

**Payment Methods:**

- Check
  - Money Order
  - Credit Card
- (We accept VISA, MasterCard, and American Express)
- Wire Transfer

**Ordering Information Required:**

- Your name, telephone and fax number
- Your Siemens account number
- Complete "bill to" and "ship to" addresses
- Purchase Order Number
- Catalog number(s)
- Quantity required
- Product manufacturer and name

**Important Notes:**

- **Hard copies of purchase orders are required for greater than \$2,500.00**
- Minimum Order Amount is \$50.00  
(This may be waived in case of "medical emergencies")
- Returns are subject to a 20% restocking fee with a minimum charge of \$100.00

8:00a.m. to 7:00p.m. EST.

**STRICT ADHERENCE TO QUALITY CONTROL PRACTICES:**

Siemens Water Technologies and ELGA LabWater products are manufactured to meet or exceed the industry standards for high purity water. All systems are manufactured to produce water in accordance with ASTM, CLSI/CAP, and USP standards for Type I, II, III and pharmaceutical grade water.

As a global company, our constant commitment to the quality of our product is demonstrated with our adherence to quality standards such as ISO 9001/EN29001, and cGMP guidelines. These quality systems guarantee the consistency, and quality in workmanship of our products. Multiple in-process control steps ensure that our customers will be receiving the highest quality products available.

Our quality systems ensure that our design and component selection, purchasing, assembly and testing are all carried out to detailed procedures which are routinely audited by an external certification body.

At each step of our manufacturing process, we check to ensure that our quality requirements are being met, and at the end of the process, all the functions of every unit are tested and approved before the product is released. ELGA LabWater products are designed and tested to meet international standard EN61010, relevant EMC (Electromagnetic compatibility) standards, and UL® safety standards. Quality is key at Siemens Water Technologies and ELGA LabWater. We aim to provide the highest quality products and services to our valued customers worldwide.

**PRODUCT RETURN POLICY**

Products incorrectly ordered or defective may be returned through our return authorization system for credit or replacement. A 20% restocking fee will be charged for each return due to customer order error. This policy does not apply to special, custom made or modified products. Any modified or special, custom manufactured product are non-returnable. Contact our technical services department for all product returns. All our products are 100% satisfaction guaranteed.

**WARRANTY:**

Siemens Water Technologies warrants the products manufactured by it against defects in materials and workmanship when used in accordance with the applicable instructions for a period of one year from the date of shipment of the products. Siemens makes no other warranty expressed or implied. There is no warranty of merchantability or fitness for a particular purpose. The warranty provided herein and the data specifications and descriptions of Siemens products appearing in the published catalogs and product literature may not be altered except by expressed written agreement signed by an officer of Siemens. Representation oral or written which are inconsistent with this warranty or such publications are not authorized and if given should not be relied upon. Siemens reserves the right to change the specifications within this literature at any time without prior notice.

Siemens is a global company, providing water purification products and services worldwide. Please contact the Siemens Water Technologies office closest to your location to obtain detailed information about the products available. If you need assistance locating an office, call our customer care department at 1.800.466.7873. At Siemens, we are committed to customer satisfaction and will work to provide you with whatever you need to manage your water purification needs.
